
Laboratory of Reproductive Medicine

Offer

- *In vitro* oocyte maturation (IVM), *in vitro* fertilization (IVF) and embryo culture (IVC)
- Flow cytometry and sorting of sperm (FACSAria, FACSVerse, BD Bioscience)
- Intracytoplasmic sperm injection (ICSI)
- Immunocytochemistry of oocytes and embryo
- Epi-fluorescent and confocal laser-scanning microscopy, live cell imaging (Olympus, IX83, Tokai Hit)
- Western Blotting (Biorad)

Expertise

Laboratory of Reproductive medicine is focused on:

- spermatogenesis,
- oocyte maturation,
- mechanisms of fertilization,
- pre-implanted embryonic development *in vitro*.

In addition to *in vitro* experiments, mouse model offers *in vivo* testing of selected environmental pollutants.

Members

- Jan Nevoral, Ph.D., M.Sc.
- M.V.D. Olga García Álvarez, Ph.D.
- Miriam Štiavnická, M.Sc.
- Hedvika Řimnáčová, M.Sc.
- Tereza Fenclová, M.Sc.
- Václav Rúčka, M.Sc.
- Prof. Milena Králíčková, M.D., Ph.D.
